

AC Current Probe Model MN02

The MN02 is a small, compact AC current probe. Designed to meet the most stringent demands in industry and electrical contracting, they also meet the latest safety and performance standards.

The probe has a measurement range up to 100Arms which makes it a perfect tool for measurement with DMMs and recorders.

The Model MN02 is compatible with any AC ammeter, multimeter, or other current measurement instrument with an input impedance lower than 10 Ω . To achieve the stated accuracy, use the probe with an ammeter having an accuracy of 0.75% or better.
